

ENVIRONMENTAL POLICY STATEMENT

SMG Contracts Ltd considers management of its environmental risks and performance of equal importance to other critical business objectives. It is aware of the impact its business has on the environment and takes positive steps to control or eliminate any pollution risks. Our Environmental Policy is clear on our commitment to managing environmental issues in a responsible and sensible manner, accepting that we have responsibilities to afford generations the choices and opportunities that we are currently enjoying.

We have examined our environmental performance and identified the areas of our business activities, products and services, which interact with the environment. We are committed to responsibly managing these aspects of our business to avoid, reduce or control pollution and will continually improve on environmental performances in these areas. We will meet environmental legislative and regulatory requirements in accordance with ISO 14001: 2015.

For this purpose, we have put in place these environmental considerations:

- We will endeavour to minimise waste production at head office and on-site by assessing the waste streams from waste generation to disposal. We acknowledge the financial and environmental gains of re-cycling, re-using and reducing waste;
- We will ensure that the best available facilities and control mechanisms are applied to the storage, use and disposal of substances at head office and on site that could otherwise cause harm to the environment;
- We will seek to review our emergency procedures to ensure pollution prevention;
- We will seek to conduct operations with concern for local residents;
- We will ensure, where possible, all vehicles and construction equipment are as fuel efficient as possible.
- We will consider the life cycle of the operations of SMG Contracts and consider how to control and/or influence these

We monitor our system to determine our success in achieving specific objectives and targets made in respect to the above and review this annually as part of our systems management review. As part of the review, we look at trends and determine where we can continue to improve our environmental standards. This policy will be reviewed annually with specific company objectives and targets developed

Director (Sean McGowan)
